

# **First Solar Panels and Now This !?!**

## **NV Energy is at it again...**

They want to fill their coffers without any concern for Smith Valley residents. **Douglas County and Antelope Valley (California)** get to enjoy having more power available for future development while the few residents in rural Smith Valley get a ***high voltage electrical generating facility*** with graded heights up to 58 feet tall (*our current power poles are only 20 and 40 feet tall*) that requires land enough to hold more than three football fields on the valley floor! Along with a ***high voltage transmission line*** all down Lower Colony Road with poles from 65 to 90 feet tall!

### **The Time to Act is Now!!!**

*A Community Meeting will be held  
Thursday, June 23rd at 6pm at the Smith Valley  
Baptist Church on Hudson Aurora*

**Please plan to attend  
Voice your opinions and get more information**

Your help is needed now more than ever. There is currently no Smith Valley Advisory and your Smith Valley Commissioner has recused himself do to personal conflicts of business interest.

NV Energy is not here for us or our farmers. They never have been and they are not now. Please do not miss this last opportunity. We are the guardians and stewards of this beautiful valley and this project will forever change the face of our community. It is up to us to promote the public welfare and advance the public interest for our area.

\*Note: As the school is redoing their floors and the library is too small, the Smith Valley Baptist Church has graciously agreed to let us use their facilities; however, this is not a church sponsored event. Thank you so much. For more info contact: Debbie (775) 721-0924
